Department of CSE A NSS Volunteer

### **Introduction**

The National Service Scheme (NSS) camp was conducted at a government school near NIT Trichy with the objective of engaging and educating school students through various interactive and skill building activities. The event aimed to foster enthusiasm, teamwork, and confidence among the students.

### **Activities Conducted**

#### **1. Student Competition – Triangle Challenge**

In one of the classes, we organized a fun competition where students had to build a triangle using the sequence of numbers (1, 3, 5, 7) as quickly as possible. This activity helped improve their problem-solving skills and encouraged friendly competition among them.

#### **2. Dance Activity**

To bring energy and enthusiasm to the classroom, we encouraged students to participate in a team based dance activity. Both boys and girls formed teams and performed, fostering team spirit, self expression, and confidence.

#### **3. Communication Skills Session**

A session was conducted to enhance the students' communication skills. We invited students to come to the front of the class and introduce themselves. This exercise helped them build self confidence and improve their public speaking abilities.

### **Impact and Learning Outcomes**

- 1) Increased student participation and engagement through interactive sessions.
- 2) Improved confidence levels in students through public speaking exercises.
- 3) Promoted teamwork and creativity via dance and competitive games.

4) Encouraged a fun and collaborative learning atmosphere.

### Conclusion

The NSS camp was a great success, allowing students to learn in an engaging and interactive environment. It also provided volunteers with an opportunity to contribute to the community and enhance their leadership and organizational skills. We look forward to conducting more such activities in the future to benefit young students and promote holistic learning. Submitted to: Professor Dr. Mallikarjuna sir.
